PRESS RELEASE

International online conference presented the cornerstones of the climate strategy of the Upper-Tisza region.

An international online conference was organized by the Technical University of Cluj-Napoca established between 18 and 20 November in the framework of the HUSKROUA cross-border partnership. In connection with the GeoSes project. With the title: "Disaster risk management and risk monitoring solutions"

Next to the Hungarian, Slovak, Romanian and Ukrainian experts participating in the project at the conference in addition, acknowledged international experts joined the conference as well, from world-renowned universities of technology. Szabolcs-Szatmár-Bereg County Self Governance as one of the GeoSes project's Hungarian partner presented the achievements of the project on the first day of the online event. Dr. Róbert Vass, one of the Hungarian experts in the project, described the basics of the climate strategy program being prepared by the self governance for the Upper Tisza region.

At the conference workshops and section meetings the latest satellite soil monitoring and field analysis technologies and methods were introduced to the participants. And the presenters showed how these technologies can be used effectively in the in forecasting various natural disasters and international collaborating, by sharing the scientific results of the partners, how they can make make this joint work even more effective.

Planned duration of the project: 1 December 2019 - 30 November 2021 (24 months)

The budget of the project: 938.105.22 EUR

Hungary-Slovakia-Romania-Ukraine ENI CBC Programme 2014-2020
